

ABSTRACT

In a dosing device for drawing in and dispensing a free-flowing medium from a container having an inlet (60) and a discharge opening (62.1 to 62.4), the inlet (60) and the discharge opening (62) are disposed separate from each other, a dosing and displacement chamber (61) being provided between them and the inlet (60) and/or discharge opening (62.1 to 62.4) being closable.
